

Welcome from Editor-in-Chief

Dr. Sushil Nagar

Department of Biochemistry, University College, Kurukshetra University, Kurukshetra-136119, India

About JIB: The Journal of Innovative Biology (JIB) (e-ISSN: 2348-6473) is an open access, peer reviewed, Quarterly (4 Issue per year) journal that rapidly publish original, authentic and fundamental research articles, review articles and short communications in all the area of Life Science. The journal attempts to provide a platform for researchers to publish their work in high quality and provide useful insights. The main focus is to capture the novel thoughts and ideas from all across the globe and make science available to the best of minds. The Journal welcomes the submission of manuscripts that meet the general criteria of significance and scientific excellence.

Published Online: 30 March 2014

The Journal of Innovative Biology (JIB) is the leading association of specialists and scholars in the field of biology. Its members are involved in the creation and dissemination of knowledge about innovative ideas related to the biological sciences. The objectives of JIB are to foster research practice among budding scientists or scholars and publish insightful, influential and timely articles that make significant contributions to our knowledge of various fields which come under Biology i.e. Biochemistry, Microbiology, Biotechnology, Food Technology, Bioengineering, Environmental Science, Nanotechnology, Agricultural Research, Bioinformatics. JIB is an interdisciplinary international journal; its broad scope is designed to create accessible, thought-provoking content that is widely read and cited by the general biological community. In other words, JIB is the premier intellectual home for scholars engaged in "conversations" about new innovative ideas.

The 1st issue of JIB i.e. march 2014 is getting release with the help of its members, editors, reviewers and all other JIB members. In response to the call of papers, JIB received 12 submissions originating from authors at different institutions in India. Of these

12 submissions, 9 articles were selected for external review which were handled by different area editors and consulting editors. After several rounds of review and revisions, 7 of those articles now appear in this issue.

The editorial team consciously chooses not to restrict the subject areas for a specific field. Scholars are invited to send their best work, and all topics that fit within the domain of the JIB Statement of copyright policy (see <http://www.jibresearch.com/Copyright-form>) are considered. The key criteria for manuscript acceptance are innovativeness and potential contribution to Life Science theory. Manuscripts can also have empirical content as long as they are guided by newly developed theory. All submissions go through the regular double blind review process. All of the JIB Area Editors and many members of the JIB Consult Editorial Board, are actively involved for our regular publication of issues. Once Editor-in-chief recommend acceptance of a manuscript for publication in JIB, the article then go through a second screening process before it is selected for inclusion in the JIB issues.

Our goal as members of JIB is to make sure that you, the readers, can be assured that the time you spend with Journal of Innovative

Biology will be filled with the most important, creative, scholarly, and meaningful articles and studies produced by members of our community. The journal strives to create a community scholars, thinkers and visionaries through the discourse that appear in its pages, but honors the past through understanding the forces that have created our current dilemmas and find the threads leading forward to our future.

The journal JIB is a living, breathing organic creation that depends upon the participation of our community of biological sciences for its continuous growth and evolution. I encourage you to participate

in the journal as a contributor of articles, as a reader, as a reviewer and as an advocate for the ideas you find useful by submitting letter to the editor. For us in biological sciences to be successful our ideas must be powerful and innovative. There is nothing more rewarding than working on noble causes with noble people and we in the JBI community have a number of noble and innovative individuals moving us onward.

Finally I want to thank the entire JIB team, editors, reviewers, editorial board members for their dedication and vision. They make it all happen.

Editorial Staff:

Dr. Sushil Nagar

Kurukshetra University Kurukshetra

Dr. Chetan Sharma

Guru Nanak Khalsa College, Yamuna Nagar

Dr. Gaurav Garg

Maharishi Markendeshwar University, Mullana

Dr. Seema Sangwan
